

Audiologist Job Specification

Duties include the following:

Diagnostics:

1. Provision of specialist audiological diagnostic testing, including but not exclusively; pure tone audiometry, speech audiometry, acoustic reflex testing & tympanometry, tinnitus match and mask, APD diagnostics, high-frequency audiometry, paediatric audiometry, medico-legal audiometry.

The full-time post will include time at our range of practices and clinics across the UK with a current need for a part-time audiologist in the North West of England.

2. Providing audiological support and diagnostic services to ENT clinics.

Musicians:

1. To perform hearing assessments and advice to musicians under the MHHS (Musicians' Hearing Health Scheme) on hearing protection.

Rehabilitation / ear care:

1. To diagnose, fit, verify and manage hearing impairment across a broad range of patients; recommending appropriate hearing aids from all major manufacturers.
2. The assessment, fitting and fine-tuning of the Lyric hearing aid (additional training will be provided).
3. Taking of appropriate aural impressions in accordance with British Society of Audiology recommended procedures for hearing aids, hearing protection including in ear monitors.
4. Provision of clinical ear care services, including wax removal using techniques including: instrumentation, irrigation, and microsuction (additional training will be provided).

General:

1. To develop and maintain good communication with all levels of management and build partnerships with the wider organizations in the promotion of the business; in order to further develop the services at Harley Street Hearing.
2. To support research and audit projects within the department including support of other audiology and non-audiology staff in the performance of audits.
3. To maintain appropriate records of all clinical practice in accordance with Harley Street Hearing procedures.

4. To contribute to the updating of Social Media.
5. To supervise, support and guide staff undertaking work in areas for which you are responsible and promote maintenance of an efficient, effective and high-quality service for users.
6. To assist in the training and assessment of the other audiology and non-audiology staff.
8. To contribute to improving and extending audiological competence and business development in liaison with the Harley Street Hearing Partners.
9. To maintain appropriate Continuing Professional Development as required under registration to the Health and Care Professions Council.
10. Provision of presentations and training including observation of clinical practice in-house and for outside agencies as directed by Clinical Director.
11. Any other duties as may be determined from time-to-time, to meet clinical needs and / or general service provision.
