

## HARLEY STREET *new location*

*We're now at both ends of Harley Street.*

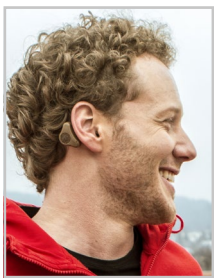

We proudly announce the unveiling of our new clinic to meet the growing demands of our practice. Introducing 127 Harley Street, a state-of-the-art facility with an additional six clinic rooms which offer luxury facilities and equipment. With the addition of six clinic rooms, we can now offer an even greater level of convenience and comfort. Following its move from 7 Devonshire Street, our dedicated Balance Centre will provide an enhanced environment for comprehensive

balance assessments and treatments. Our team of highly trained clinical audiologists will be working on rotation at both 127 and 2 Harley Street, ensuring uninterrupted access to our renowned diagnostic services. Your patients can continue to expect the same level of expertise and personalised attention that sets us apart. Stay tuned for further updates as we continue to grow and improve our services for you.

## BONE CONDUCTION *hearing aids*

As not all individuals with hearing loss are suitable candidates for surgical implantation we are proud to provide three innovative non-surgical solutions that cater to those with mixed or conductive hearing loss, as well as individuals managing single-sided deafness. Our team of experts are dedicated to finding the best solution, ensuring optimal hearing performance and overall satisfaction. If you have any patients who could benefit from bone conduction hearing aids, don't hesitate to contact us.

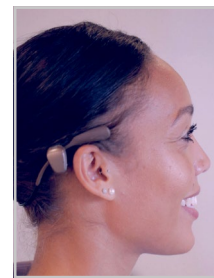

### Adhear

*A discreet device worn behind the ear which adheres to the skin via a small waterproof adhesive.*

### Contact Forte

*A discreet device worn behind the ear, which can be secured either with an adhesive adapter or with a custom-made headband or softband.*

### BAHA 6 Max SoundArc

*A lightweight headband is used to secure the bone conduction device in the correct position behind the ear.*

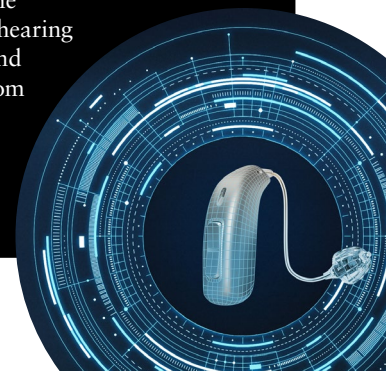

## LEADERS IN *hearing technology*

We are dedicated to staying at the forefront of hearing technology, ensuring our clinical audiologists are equipped with the latest tools and knowledge to offer the best possible solutions to our patients. As part of this commitment, we thoroughly review all new products before their UK launch, guaranteeing that we are always at the cutting edge of advancements in the field.

Harley Street Hearing hosts a global platform on YouTube. Our forum allows us to connect with audiences worldwide, providing valuable insights and information on hearing-related topics, also offering honest and unbiased opinions on the latest hearing technology. Partner Matthew Allsop is the Video Content Manager for 'Hearing Tracker' - the world's first truly independent resource for hearing aid consumers.

For the past five years we have been the audiology providers of the Musicians' Hearing Health Scheme. To date we have cared for over 16,000 musicians conducting audiological assessments, educating on the importance of hearing conservation and providing custom made hearing protection. □

Harley Street Hearing is the largest independent audiological practice in London with over 1100 Google reviews. We are audiology providers to **HCA Healthcare** and **Phoenix Hospital Group**. We provide clinical services for the national **Musicians' Hearing Health Scheme** and to the **British Association for Performing Arts Medicine**. We are a clinical placement training site for **University College London**, fostering the growth of future audiology professionals. We pride ourselves on our **HIGH-QUALITY SERVICE AND FRIENDLY PROFESSIONAL CARE**.
